

# Structural Engineering Associates

## **Brian D. Welch, PE, SE** Vice President, Structural Engineer

Brian Welch applies his knowledge from 16 years of structural engineering experience to each new project. His recent projects include a 205,000 square foot four-story wood-framed student housing building at the University of South Dakota. He also has extensive experience in steel-framed office buildings. Brian works diligently to design and detail his projects to provide the best service possible.
